Education

Software Engineering

VIA University College Aug 2018 - Sep 2022

- Heterogeneous systems
- Object-oriented programming
- Algorithms & Data Structures
- Networking & Security

Skills

- C#
- Vue
- React
- TypeScript/JavaScript
- Git
- Docker
- SOL

Language

- English
- Romanian
- Danish

Andrei *lordache*

Software Engineer

About Me_

Adaptability and **a hunger for growth** are my second nature. With Software Engineering knowledge across both back-end and front-end, my tech stack ranges from TypeScript and Front-end frameworks to C# .NET for back-end, I approach every challenge with dedication and enthusiasm

Experience	

Associate Engineer

LEGO Systems A/S Sep 2022 - June 2025

- Created solid and reusable front-end solutions in React TypeScript, improving overall performance and maintainability
- Applied expertise in designing and developing RESTful .NET APIs for optimal integration with the front-end applications
- Engaged with CI/CD workflows in GitHub Actions and had hands-on interactions with Azure services
- Gained significant cost savings while improving efficiency and responsiveness by optimizing shop floor systems
- Collaborated with UX/UI designers to deliver and maintain complex front-end designs

Front-end Developer Intern

Wedio A/S Aug 2020 - Jan 2021

- Developed web pages using the JavaScript framework
 VueJS(NuxtJS)
- Developed the front-page update of the company's main website
- Developed one of the dashboard pages in the migration from Ruby on Rails to NuxtJs
